RaceDay MVC Frontend

This is the ASP.NET Core MVC frontend for the RaceDay platform.

How to run locally
1. Ensure the RaceDay API is running.
2. Run `dotnet run` in the terminal.

How to run with Docker
To build and run this application in a Docker container, use the following commands:

```bash
# Build the Docker image
docker build -t raceday-mvc .

# Run the container (Maps port 8080)
docker run -d -p 8080:8080 --name raceday-app raceday-mvc
```
